

Newsletter

MARCH 30, 2008

VOLUME 1, NUMBER 1

Why another Newsletter?

*"I am currently jobless, and hence instead of sitting idle, decided to let people use my knowledgebase to enhance their working convenience, using this monthly e-mail newsletter. My idea is to spread the simply known stuff for the IT professionals to the greater business community, to reap benefits from it, if any. If any one feels it's annoying, please write a blank mail to unsubscribe@hexcodetechnologies.com to unsubscribe. If any one likes it, please distribute it to whoever you feel need it. No copyright issues. Use it and enjoy your day to day work. – Samudra Dutta Gupta, CEO of HexCode Technologies
K K e-mail contact: editor@hexcodetechnologies.com "*

Hotmail, Yahoo mails using Outlook Express

Open Outlook Express. Select Tools →Accounts... from the menu in Outlook Express. Click Add and select Mail...Enter your name. Click Next.

Enter your Windows Live Hotmail address ("abcdxyz@hotmail.com", for example). Click Next again.

Make sure HTTP is selected under My incoming mail server is a ___ server.

Now, select Hotmail under My HTTP mail service provider is ___. Click Next.

Enter your Windows Live Hotmail address ("abcdxyz@hotmail.com", for example) under Account name:

Type your Windows Live Hotmail password under Password. Click Next. Click Finish. Click Close to close the Outlook Express accounts window.

Now, select Yes to download the Windows Live Hotmail folders list in Outlook Express.

For Yahoo mail? Go to [yopmail](http://yopmail.com) to download small software to get your Yahoo mail in Outlook.

Free PIDGIN for chatting using MSN, Yahoo, AOL,

If you are using multiple IDs for chatting with your friends, you may try out this software, which can log you to most of my known chatting servers, and allow you to chat using whatever ID you want. You can download it from <http://www.pidgin.im/download/> and see if it helps you, in utilizing your PC resources in a better way.

Let us hide some info in our XP professional Laptop

Encrypting your data is easy:

1. Select the folder that you want to encrypt. In our case we want to encrypt our "Abc" folder.
2. Right click on the folder and open the "Abc" folder properties:
3. Select and check the "Encrypt contents to secure data" attribute - That's all!
4. Note: Under Windows XP encrypted folders are displayed with a GREEN color and remember the password, which is key to open your such folder.

Let us talk about some business application

Though I am not a great fan of Microsoft Outlook, yet I am stuck with Outlook as my main business application, because of Cost-cum-support-features issue. However, I frequently look for features, which were not found in Outlook (no not even in Outlook 2007) and hence, I found the below mentioned add-ins, which are pretty

Important information
from Microsoft
Technology forefront

1. [Vista SP1](#) is out.
2. [Windows Server 2008](#) launched.
3. [Visual Studio 2008](#) launched. Freely available limited feature packed Visual Studio 2008 Express edition can be downloaded from [here](#).
4. [SQL Server 2008](#) is launched too.

Let us get some FREE training from Microsoft Website

Microsoft is really good at Marketing. Isn't it? They know that we all need to know their product well, before we buy and use their products. And hence, they have a complete site dedicated to teach us Office Application systems, which you can find [here](#). Learn at your own pace and enjoy your work.

Our children's safety from Cyber Crimes

Unfortunately the same advances in computer and telecommunication technology that allow our children to reach out to new sources of knowledge and cultural experiences are also leaving them vulnerable to exploitation and harm by computer-sex offenders. So, please check this "[Parent's Guide](#)" from the FBI, USA, to know the crime scene working behind our child and to be aware of such problems, and where can you effectively provide support to your child. Remember, your child has only you, to fall back on, for such support, in most of the cases. So, don't deprive him/her from your knowledge about similar incidents.

You can contact Japanese Police Department at 03-3431-8109 in case your children face any cyber crimes and can use the following FREE English Translation Service:
